EXPERIENCE

Agentic Developer

SISP

12/2025 - Current Stockholm/Remote

- Currently building the MVP for Sweden Startup Next which collects and showcases data on swedens startup ecosystem.
- Fastpaced workflow with github kanban and cross-functional teamwork over slack, daily standups and weekly meetings.
- Top modern agentic spec-driven development strategy with Claude.
- Contributing to the different repositories and agentic layer.
- Techstack: Typescript, Javascript, React, Next.js, Tailwind, Git, Supabase, Node.js

Founder

Osciwave

03/2026 - Ongoing Project Location

- Web3 mobile-application that mints your favorite sound into a 1 of 1 ERC721 NFT that is used to verify payments.
- It is built as a verifier on your existing wallets with your chosen sound as a sonic signature.
- Includes smart contracts, mp3/wav uploads to IPFS, simple UI/UX and a beautiful landingpage.
- Built with Solidity, Foundry, Wagmi, Node.js, Next.js and Tailwind

Founder

Supplementscanner.io

08/2025 - Ongoing project Supplementscanner.io

- Supplement barscanning app that gives the user a quality analysis on dosage and ingredients aswell as a desciption on usecase and benefits.
- Built with AI integration for the data ingestion engine, zod normalization + ai fallback. Jina Reader to extract LLM friendly input from the URL.
- Built with Typescript, React/React Native, Node.js, Expo Go

Founder

Spontana

08/2024 - Ongoing project https://spontana.app

- Event aggregator collecting and promoting Stockholm local events and happenings.
- Uses API's to fetch events.
- Login/signup feature with Supabase backend.
- Users can create and save events on their page.
- Built with React, CSS, Node, Git and Supabase

SUMMARY

Fullstack frontend-heavy developer with a founder's mindset, specializing in the MERN stack and agentic AI workflows. I take ideas from zero to beautiful working product — whether that's internal tools, prototype platforms, or Web3 applications. I bring strong communication skills, a low-ego attitude, and genuine eagerness to learn to every team I join. At my best in fast-moving environments where curiosity and execution matter more than titles.

TRAINING / COURSES

Agentic Developer internship

Sweden Startup Next

Blockchain Basics

At Cyfrin Updraft- Basics of Blockchain, EVM, Sending on-chain transactions and understanding decentralized applications

Web3 Fullstack Development

At Cyfrin Updraft- Build functional, blockchain-powered applications. Learn how to connect wallets and smart contract features to your apps and connect a frontend to the blockchain.

Foundry Fundamentals

At Cyfrin Updraft- Experience with Foundry Forge and Anvil while learning about Chainlink blockchain oracles, smart contract testing, and local network deployment.

EXPERIENCE

Decentralized Crypto-exchange (DEX)

Selfmade project

10/2025 - Ongoing project Not ready for deployment yet

- Multi-asset, ETH and ERC20 token-support
- Swap tokens with calculated slippage% and fees
- OpenZeppelin security standards like onlyOwner and reentrancyGuard
- Flashloan feature
- Security measures like Timelock delays and validation checks
- Liquidity pool with 'add' and 'remove' functionality
- Native Mock-token
- Built with Solidity smart contracts, Wagmi, Viem, Rainbowkit, Ethers.js, Foundry, React, JavaScript and more

Web3 Crowdfunding DApp

Selfmade project

09/2025 - 10/2025 fund-me-web3-app.vercel.app

- Decentralized crowfunding app on Ethereum testnet (Sepolia).
- On-chain transactions.
- Global accessibility with no middlemen - pure peer to peer transactions.
- Security measures to prevent attacks.
- Metamask wallet integration.
- Blockchain integration with Ethers.js
- Live pricefeed with Chainlink and USD conversion.
- Built with Solidity smart contracts, tested with Foundry, forge.

Manufacturing Technician

AstraZeneca Sweden Operations

05/2024 - Current Södertälje

- Operate and monitor pharmaceutical production machinery in a sterile environment, ensuring compliance with strict GMP and industry regulations
- Maintain detailed documentation and reporting to meet regulatory and quality control standards
- Conduct quality checks to ensure product integrity, minimizing errors and maintaining high production standards
- Collaborate with cross-functional teams to ensure smooth workflow and adherence to safety protocols
- Created an application on spare time to document errors and have a searchable database with solutions to those errors to help troubleshooting
- Joined AZ's smart factory/innovation hub where we have hackathons brainstorming new projects and building them together.
- Now helping part-time with app-development and educating in agentic development workflow at AstraZeneca

EDUCATION

MERN Fullstack development

Techover Academy

04/2023 - 03/2024 Stockholm

- Modern tech-stack
- Working cross-functional with Git/Github forking/merging and push/pull
- Built projects and a portfolio
- Workshops and hackathons
- Developer best practices
- Note key learnings, experience and skills gained relevant to the job.

SKILLS

Solidity · Smart contracts · Ethereum · Blockchain · JavaScript · Tailwind · React · Express.js · Node.js · MongoDB · Ethers.js · Web3.js · Visual Studio Code · Git · EVM · Prompt engineering · Foundry · OpenAI · ClaudeCode · Typescript · Next.js

ACHIEVEMENTS

Troubleshooting app for workplace

I built a troubleshooting app with database for the machines to dramatically reduce time troubleshooting, this will soon be implemented at AstraZeneca

Professional website for Barbershop

I Built a professional website for my local barbershop with React and modern design

INTERESTS

Web3 development, Blockchain and decentralized finance

Artificial intelligence, development and training to finding ways to improve daily tasks with AI

Fitness and bodybuilding

Japaneese sportscars
